Finding Perimeters of Quadrilaterals

- 1 Use a ruler to measure the sides of each quadrilateral in centimeters. Label all the sides of each shape. Then find the perimeter. Show your work.

<p>ex</p>  <p style="margin-left: 40px;">$2 + 2 + 4 + 4 = 12 \text{ cm}$</p> <p>Perimeter = <u>12 cm</u></p>	<p>a</p>  <p>Area = _____ Perimeter = _____</p>
<p>b</p>  <p>Perimeter = _____</p>	

- 2 Solve the following problems:

a $347 + 652 =$ _____

b $65 \times 29 =$ _____

c $60 \div 4 =$ _____

d $501 - 388 =$ _____
