

Thinking About Triangles

Use the following information to help solve the problems below.

You can group triangles by the size of their angles.		
Acute Triangles  all 3 angles are acute	Right Triangles  1 angle is a right angle	Obtuse Triangles  1 angle is an obtuse angle

You can also group triangles by the lengths of their sides.		
Equilateral Triangles  all 3 sides are the same length	Isosceles Triangles  2 sides are the same length	Scalene Triangles  no sides are the same length

1 Fill in the bubble to show what kind of triangle each one is.

<p>a <input type="radio"/> acute <input type="radio"/> right <input type="radio"/> obtuse</p> 	<p>b <input type="radio"/> acute <input type="radio"/> right <input type="radio"/> obtuse</p> 
<p>c <input type="radio"/> acute <input type="radio"/> right <input type="radio"/> obtuse</p> 	<p>d <input type="radio"/> equilateral <input type="radio"/> isosceles <input type="radio"/> scalene</p> 
<p>e <input type="radio"/> equilateral <input type="radio"/> isosceles <input type="radio"/> scalene</p> 	<p>f <input type="radio"/> equilateral <input type="radio"/> isosceles <input type="radio"/> scalene</p>
